

BEHAVIORAL FUND R

Fund Benchmark: STOXX Europe 600 NR

Investment Objective

MAPFRE AM Behavioral Fund is an European equity fund whose objective is to generate attractive risk-adjusted returns by taking advantage of market inefficiencies caused by investors' psychological biases. The fund managers study situations in which irrational decisions by market participants tend to lead to fundamentally mispriced securities. The investment process employs quantitative screens and tracks certain corporate actions that may lead to behavioral inefficiencies. Once a potential mispricing has been identified, the fund managers analyze the opportunity using a fundamental analysis process that applies a value investing philosophy. The fund targets companies that trade at a discount to intrinsic value and are likely to reward patient investors by compounding shareholder value over time. The fund will invest at least 75% of its net assets in European-listed companies, directly in equities or through the use of equity derivatives. As a complement to this European focus, the fund has the ability to diversify its exposure and invest up to 25% of its net assets in companies listed on exchanges in non-European OECD countries.
