What is this product?

Type

This product is an investment fund.

RIIP term

There is no maturity date on this product.

Objectives

Investment objective The objective of the Sub-fund MAPFRE AM - IBERIAN EQUITIES is to invest, either directly or through financial derivative instruments, at least 75% of its net assets in transferable securities (mainly equity securities) of companies that are domiciled in, or carrying out the main part of their economic activity in, Spain or Portugal.

Investment policy The Sub-fund intends to hold a diversified portfolio, but without pre-commitment to hold minimum or maximums levels in certain sectors, market capitalisation size or countries.

The investment process incorporates a framework to analyse the environmental and social impact of the entity related to the investment, as well as its governance. The goal is to favour companies and entities having a sound ESG (environment, social, governance) strategy as the investment manager believe that this gives a better risk return profile.

The Sub-fund may invest on an ancillary basis in (i) fixed income instruments denominated in euro, such as government or corporate debt securities which are listed on a Regulated Market in an OECD Member State with an investment grade credit rating (with a rating of not less than the BBB- by any of the well-known rating agencies), (ii) deposits, (iii) liquid assets and (iv) Money Market Instruments.

More than 35% of the Sub-fund's net assets may be invested in instruments issued by EU Member States, autonomous communities, local entities, international organisations where Spain is a member or other countries that have a rating which is at least equivalent to that of Spain.

The Sub-fund classifies as Article 8(1) under SFDR.

The Sub-fund may invest in below investment grade fixed income instruments if the credit rating of the issuer is at least equal to the rating of Spain at the time of the investment by the Sub-fund.

The Sub-fund may also invest up to 10% of its net asset in shares or units of UCITS and other UCIs and may not invest in UCITS or other UCIs that are managed by the Investment Manager or an affiliate thereof.

The Sub-fund may also use up to 50% of its assets for repurchase transactions and total return swaps.

Share Class Benchmark Spanish Ibex-35

Benchmark uses The Sub-fund's benchmark is the Spanish Ibex-35 (total return net) (the "Benchmark"). The Benchmark is solely used as a reference to compare the performance of the Sub-fund but not for the construction or choice of constituents in the portfolio. For this reason, the Sub-fund's portfolio might differ from the Benchmark.

Derivative Policy The Sub-fund may invest in financial derivative instruments traded on a regulated market for hedging and investment purposes. The Sub-fund may use OTC derivatives for hedging purpose only.

Currency The fund's base currency is EUR.

Redemption and Dealing The shares of the Sub-fund are redeemable on demand and dealt with on a daily basis.

Distribution Policy Income arising from the Sub-Fund will be accumulated. No dividend will normally be distributed.

Intended retail investor

The Sub-fund may not be appropriate for investors who plan to withdraw their money within five (5) years.

Practical information

Depository The fund depository is BNP Paribas, Luxembourg Branch.

What are the risks and what could I get in return?

Risks

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class.

This rates the potential losses from future performance at a medium level, and poor market conditions could impact the capacity of Waystone Management Company (Lux), S.A to pay you.

Beside the risks included in the risk indicator, other risks may affect the fund performance. Please refer to the fund prospectus, available free of charge at <https://www.waystone.com/>.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: this type of scenario occurred for an investment between March 2015 and March 2020.

Moderate: this type of scenario occurred for an investment between January 2016 and January 2021.

Favourable: this type of scenario occurred for an investment between May 2019 and May 2024.

What happens if MAPFRE GROUP is unable to pay out?

If the Fund is not able to pay owed amounts to the investor, the investor is not covered by any national compensation scheme. Therefore, to protect the investor, the assets are held with a depositary company separate from the Fund which would liquidate the investments and distribute the proceeds to the investors in the event of default of the Fund. In such occurrence, it is possible to lose your entire investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

| Example Investment 10,000 EUR | | if you exit after 1 year | if you exit after 5 years (recommended holding period) |
|-------------------------------|--|--------------------------|--|
| Total Costs | | 179 EUR | 939 EUR |
| Annual cost impact* | | 1.8% | 1.8% each year |

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,

■ 10,000 EUR is invested.

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 2.1% before costs and 0.3% after costs.

Composition of costs

| One-off costs upon entry or exit | | Annual cost impact if you exit after 1 year |
|---|---|---|
